Machine number	
Description	Standard Module and Equipment Features Central Control: Bobst C.U.B.E. system (centralized microprocessor with touchscreen) for job storage and rapid recall. Feeder: Continuous feeding system, often equipped with an electric vibrator and vacuum assist. Alignment Section (Accufeed): Ensures perfect board straightening before entering the folding sections. Pre-breaker: Total length of approximately 3300 mm to effectively break 180° folds. Crash-lock Bottom Module: Dedicated to folding and gluing standard and reinforced crash-lock bottom boxes. Gluing System Ejection Section: In-line ejection flipper (Flipper Ejector) to automatically reject non-conforming pieces detected by control systems.
