Description:	<p>for folding documents such as mailings, invoices, letters etc. Compact, functional, and user-friendly machine The vacuum feeder handles all types of paper: offset, coated, digital - Suitable for large formats, such as 630x320mm triptychs, produced in digital or offset printing houses - Centering the sheets relative to the suction head ensure even wear, and therefore longevity, of the folding cylinders. - Suction of the top sheet of the stack and front blowing to separate the sheet from the rest of the stack using a pump identical to the one fitted to the manufacturer's professional assembly tower stations. The pump is characterized by its low noise level. - Simple separator adjustment to prevent double-sheet picking. - Picks the top sheet of the stack. The weight of the stack does not affect proper paper picking. - Rectification tabl for optimal folding precision. <>Extremely easy to use. Th operator easily selects the format and fold type before starting work. <>Automatic folding pocket adjustment. <>No gap adjustment between the folding cylinders is necessary</p>

for papers from 53 to 200 gsm.<> - Control panel with digital display for accessing various functions <>- 24 standard folds stored in memory: single fold, accordion fold, mail fold, and roll fold (6 fold types x 4 standard formats) <>- Other folds possible with manual adjustment - Memory for specific jobs <>- Convenient and practical: squareness adjustment, 4-digit up/down counter, automatic shutoff in case of paper shortage, jam, etc. <>- In the event of a pocket jam, it opens easily without having to remove it from the machine -<>Complies with European CE safety standards
