Description	11,000 hours worked! Touch Screen Commander control ASIR III automatic signature control Servo drives 11 stitches / opening 2+2 Venturi jets Leaf chain for thin signatures Device for thread melting Belt delivery Features: Patented loop formation using blow air and an active thread cutting system Active thread divider system as standard – this is not part of the basic equipment of any other entry-level model in the market. It guarantees that threads are trimmed between the individual book blocks without tension. 1. The punch needles make the holes in the signature from below. 2. Sewing needles pull the thread through every other hole 3. Air blast blows the thread as a loop into the slotted lever 4. The hook needle grabs the loop. Then the hook needle and sewing needle pull the thread up simultaneously, creating the thread chain.

Technical details

Max. signature size	425x320 mm
Min. signature size	75x120 mm
Mech. speed	18
Weight approx.	3.450 kg
HS Code	84439959 HS Codes Classification of Other
