

Offer 382435

STAHL SBP 86.2 from 2005

Stackers

Offer Details

Offer Number	382435
Brand	STAHL
Model	SBP 86.2
Manufacturer	STAHL
Condition	Good
Year	2005
Incoterm	Free Carrier
Cylinders Condition	
Under Power	No
Still in production	No
Test possible	No
Complete and in working condition	Yes
Availability	Immediately
Counter	
Machine number	
Description	MCT Control system The horizontal stack delivery SBP is a delivery system with a high storage capacity for folded or bound products that is therefore particularly suitable for the processing of medium to large runs. The horizontal stack delivery SBP 86 allows you to deliver folded and bound products of larger runs efficiently. Even multiple-ups and delicate papers can be processed with ease. The integrated pressing unit increases the folding quality, and the height adjustable infeed makes the delivery combinable with all Stahlfolder folding machines. The most important machine functions can be controlled directly on the integrated control panel. This allows the operation of the entire machine with one person and increases your profitability. Thanks to its high buffer capacity and the possibility of processing multiple ups, the Stahlfolder SBP is the right delivery for getting started in industrial signature production, and is perfect for combining with Stahlfolder TH/KH folding machines. Technical details: Max. sheet size: 860x300 mm Min. sheet size: 120x100 mm Power consumption (kVA) 3 x 400 V, 50/60 Hz 3 x 230 V, 50/60 Hz
